

Home Care Preference List

In-home healthcare assists individuals with monitoring medications, changing dressings, catheter care, or other skilled nursing services—including assistance with their care in bathing, dressing, and grooming. Many communities have home health agencies that provide appropriate supervised personnel to help persons with both types of care. This type of care is available only with a physician order.

Following the Balanced Budget Act of 1997, DRH Health wants to assure you that you have choices in selecting a provider of in-home nursing care services. The providers listed on the back of this sheet have indicated that they are currently accepting new patients.
